

more details are available at hember.ca and include an online Google Map plus GPX & KML files (free)

This shorter route shows crossing University Ave where there is no traffic light. It is recommended that you choose the 10 km version.

The trail shown with a black line, does not exist 2020. Based on information available on the City of Waterloo website, it appears that such a trail ***may*** be constructed in the future. The cost would be substantial since it would require that the trail pass under the Conestoga Parkway. Such a multipurpose trail would provide a connection between the trails north west of University Ave (Hillside Park, Forwell Trail & Dearborn Plaza) and the trail system in Bechtel Park.
